

## About FCP

### Fluid

Control Products, Inc. (FCP) is a major manufacturer and distributor of Fluid Transfer Systems and Components to the Motorsports, Mining and Automotive Aftermarket industries. Our commitment is to bring our customers the most up-to-date Aerospace technology and designs for increased performance, service and reliability. Since 1989 FCP continues to be a leader in these markets.

### FUELAB

is a division of FCP, Inc. The FUELAB product line consists of 5 different continuous duty, DC brushless, internally controlled, variable flow fuel pumps, capable of supporting up to 1800HP. FUELAB has 2 styles of carbureted and 4 styles of EFI fuel regulators supporting five pressure ranges from 1 to 125 PSI. Standard and high flow return ports and fine thread pitch for precise pressure adjustment are just a few of the features. To keep everything clean FUELAB offers 2 fuel filter styles with 4 element choices of 6, 10, 40 and 75 micron. FUELAB fuel filters feature male AN 37 degree flared fitting end caps in sizes from -6 to -12AN. All FUELAB products are backed by a 2-year limited warranty, are gasoline, diesel, methanol and ethanol compatible and are offered in six different color schemes.

### FCP

manufactures the Promark line of custom made Intercoolers and oil coolers. Specializing in small (10 units) to large runs. Promark can keep you cool.

FCP has been the World Wide Exclusive stocking distributor for Adel Wiggins products in the Motorsports and Automotive Aftermarket since 1996. Adel Wiggins was formed in 1994 from the consolidation of the Adel Fasteners and Wiggins Connectors companies. Founded in 1938 and 1925 respectively, both companies have had a long history in the aerospace industry and enjoy strong brand name recognition. Adel Wiggins designs and manufactures an extensive line of high quality, custom designed products that serve primarily aerospace, mining and motorsports markets. Components include such items as flexible tube connectors, quick disconnects, clamps, heaters, hoses, and refueling systems

FCP is also the authorized stocking distributor for Wiggins Service Systems (WSS) in the states of Missouri, Illinois, Arkansas and Kansas. From single WSS components, to turn key fueling stations, pressurized or non-pressurized fueling systems, oil, coolant, hydraulic and transmission fluids. Fluid Control Products and WSS have the components and systems to save you time and money.

FCP designs, manufactures, kits, stocks and sells an extensive line of Specialty Fittings and related components.
